— THE WONDERFUL — RESURRECTION PLANT

The wonderful **Resurrection Plant**, as it looks closed, and open after placed in a dish of water one hour.

These plants grow on high mountain slopes—always on the North and East slopes like sentinels of everlasting life.

The **Resurrection Plant** is one of nature's most curious and wonderful plants. It lives **FOREVER** as you can take it from the water and it at once curls up into a brown ball, with its secret of life hidden securely in its heart.

A dozen of these plants immersed in water will give you a happy green decoration at an hour's notice. Place in a pretty fern dish on wet moss and tuck around the edges some dainty flower as: pansies, poppies, etc., and you have an unique decoration at small cost. Every home should have several of these plants always on hand. Price 15c; 2 for 25c.
